

OXYNENE PTY LTD
BUSINESS
PROFILE

About Company

Executive Summary

Oxynene is pleased to present our business proposal to supply your organization with top-class pest control services. With our extensive knowledge of pest control, we are confident that we can deliver high-quality pest control services that will meet all your requirements. We understand the exceptional opportunity to contribute effectively and efficiently to your corporate social investment, while also providing the most exceptional pest control services available in the country.

Company Background

Oxynene Pty Ltd was founded in 2014 by Mr. Oupa Hofmeyr in accordance with the Companies Act of South Africa. Our core business is focused on preventing and eliminating pests that cause nuisance in residential, commercial, and industrial properties. With several years of experience in the industry, we have successfully partnered with numerous estate agent professionals from top property companies to offer efficient solutions for their clients' persistent pest-related issues.

By your organization availing itself to our services it will benefit on the following:

- Ensuring compliance with local regulations of South Africa
- Keeping your employees safe in order to maximize productivity at the workplace.
- Enjoy the benefit of peace of mind knowing that your investment is well looked after.
- The benefit of a significant reduction of risk of the spread of diseases in your workplace.
- Save hundreds of Rands that would otherwise be spent on DIY products.
- Continuously educating your staff on the related pest infestation, which can help prevent future infestations.

Pest control services are absolutely necessary for companies to prevent the spread of diseases in their offices and other workplaces. In South Africa, there are several regulations that prioritize public health and safety from pests. The National Health Act (Act No. 61 of 2003) is one of the most significant regulations that outlines the responsibilities of property owners and occupiers in relation to pest control. As per Section 28 of the Act, property owners and occupiers have the clear and unequivocal responsibility to take all vital measures to prevent and control pests on their property.

Our Projects

We're proud to have tackled numerous large-scale pest control projects with great success. We've managed to effectively control infestations of cockroaches, rodents, weeds, bats, and weevils in residential, commercial, and industrial settings. Despite initial difficulties, we quickly identified the source of these infestations and implemented non-toxic control measures that eradicated pests without harming humans or pets. We take our responsibility to the environment seriously and always strive to use methods that are environmentally friendly

We provided expert guidance to the facility's management team on how to prevent future infestations and ensure the safety and health of the workers. Overall, it was a highly successful project that demonstrated our team's expertise and ability to handle even the most challenging pest control issues.

Why Us?

Vision

At Oxyne, we're committed to providing you with effective and environmentally-friendly solutions that protect your home or business from pests. We understand the importance of keeping your property pest-free, which is why we strive to exceed your expectations with exceptional service and innovative solutions to combat new and emerging pest threats. We're not just a pest control company; we're your trusted partner in creating a safe and healthy environment for you, your family, and your customers. With our preventative measures and education on pest control, you can rest easy knowing that we're doing everything we can to keep pests at bay. Choose our company for unparalleled expertise and a commitment to your satisfaction.

Mission

Our mission is to help protect homes and businesses from the negative effects of pests, such as damage to property, health risks, and decreased quality of life. By identifying and eliminating pests through various methods, such as exclusion, trapping, and pesticide application, while also offering preventive measures to prevent future infestations. Ultimately, the goal is to provide a safe and pest-free environment for our customers.
